**20.7 Reporting and Investigating Use of Force**

**I. PURPOSE:**

The purpose of this policy is to provide officers and their supervisor with guidelines for reporting and investigating use of force. In order to protect citizens and employees, the Rome Police Department is committed to documenting and investigating use of force incidents.

The authority to use force carries with it the need for accountability in order to safeguard the rights of the public and to preserve the integrity of the department. As such, it is the policy of the Rome Police Department that every officer report all incidents where force was used, as described herein, in a timely, complete, and accurate manner, as described by this policy. Any officer who uses force, is a witness to a use of force incident, or who authorizes conduct leading to a use of force incident shall not be allowed to conduct the review or investigation into the incident.

**II. DEFINITIONS:**

**CRITICAL FIREARM DISCHARGE:** When an officer discharges a firearm. Note range and training discharges, and when discharging at animals are not included under this section.

**FORCE:** Any physical strike or contact with an instrument of a person, any intentional attempted physical strike or instrumental contact that does not take effect or any significant physical contact that restricts the movement of a person. The term includes: aiming of a firearm, discharge of a firearm, use of chemical agents, use of impact weapons, use of an Electronic Control Device, taking a subject to the ground and any physical contact that includes control techniques. The term does not include escorting or handcuffing a person with minimal or no resistance. Use of force is lawful if it is objectively reasonable under the circumstance, and if the minimum amount of force that is necessary is used to effect an arrest, or protect the officer or another person.

**HARM:** Injury inflicted upon a person, whether visible or not.

**HARD HAND CONTROL:** Impact oriented techniques that include knee strikes, elbow strikes, punches and kicks. Control strikes are used to subdue a subject and include strikes to pressure points such as the common peroneal nerve (side of the leg), radial nerve (top of the forearm), or brachial plexus (side of the neck).

**DEADLY FORCE:** Any physical force that can reasonably be expect to cause death or serious physical injury.

**Less than Lethal Force:** Any use of force not intended to cause, nor likely to cause, death or serious bodily injury.

**Reportable Use of Force:** All force used other than handcuffing a compliant individual with the exception of drawing a firearm at a low ready position.

**Resisted Handcuffing:** When a person actively resists being placed in handcuffs and the officer must use “soft hand controls” to gain compliance by forcibly moving the subject wrists or arms, or to physically maneuver the subjects body so the handcuffs can be applied. The resistance may range from an active struggle to a person simply locking his/her arms to prevent compliant handcuffing.

**Serious bodily Injury:** Injury that causes death or creates a substantial risk of death. Permanent harm to health, disfigurement, permanent loss of bodily functions by any organ, or results in inpatient treatment at a medical facility. Note: minor treatment by medical professional on scene or at a hospital such as eye washing, cleansing or bandaging, evaluation with no injury discovered etc. will be evaluated on a case by case basis by a supervisor.

**Serious Use of Force:** Any action by an officer that involves: the use of deadly force or use of force in which the person suffers bodily injury or requires hospital admission or a police canine bite.

**Soft Hand Control:** The use of physical strength and skill in defensive tactics to control subjects that are reluctant to be taken into custody and offer some degree of physical resistance.

**Supervisor:** A supervisor includes a Sergeant and above who is assigned responsibility for supervising officers.

**Weapon:** Any instrument, article or substance, including a vehicle, which under the circumstances in which it is used, attempted to be used, or threatened to be used, is readily capable of causing death or other bodily injury.

### **III. PROCEDURE:**

#### **A. Force Levels**

##### **1. Level 1**

- b.) A weaponless defense technique is applied to a vulnerable area, excluding strikes (e.g. hair grab, pressure to the jaw line, shoulder grab).
- c.) An on-duty firearm discharge to dispatch an injured animal.
- d.) A weaponless defense technique control hold is applied:
  1. Forcible Arm bar
  2. Forcible Escort (elbow)

**Note:** A simple grabbing of a person to help guide or maintain control without any resistance does not constitute a reportable use of force incident or event.

**Note: Unresisted handcuffing is not considered a reportable use of force incident.**

##### **2. Level 2**

- a.) Chemical agent is applied to a person.
- b.) The use of an ECW involving any of the following circumstances:

    - e.) A weaponless defense technique, other than control holds, but excluding strikes to the head. Examples include:
      1. Hand/palm/elbow strikes;

  - k.) Any use of force which results in injuries to the subject requiring emergency medical treatment (beyond first aid) or hospital admittance.

**Note: For the purpose of this order, an evaluation by a medical professional to assess a complaint of injury is not emergency medical treatment.**
